U.S. Population by Age, 2022 Census Estimate

Emerging Trends – Changing Markets

Changing demographics

- Younger consumers/homeowners, sustainability/climate change focused consumers, fewer middle-income households, etc.

Experience culture

- \$\$\$ for experiences over goods
- Engagement is important
- Sharing culture (e.g., social media)

Emerging Trends – Responsible Consumption & Production

Sustainability / eco-friendly / climate change

- Water – reduce, recycle, reuse
- Plastic-free packaging
- Carbon – reduce emissions / footprint
- Pollinator friendly gardens (certification, maintenance, etc.)
- Lower-input plants (reduced fertilizer, drought tolerant, less maintenance)

Altruism

- Fair labor, environmental concerns, fair trade, aiding less fortunate societies, origin information, etc.

Eco-labeling trends and consumers' perspective

Eco-labels signal a product's environmentally friendly features

- Differentiation, competitive advantage, capture market share

464 eco-labels in 199 countries across 25 sectors

203 eco-labels in the U.S.

- 35% of eco- and green-certification in agriculture

Tradeoffs between trust and skepticism of claim credibility

The Study Asked: If an environmentally friendly certification existed for retail flower providers, I would be more willing to make purchases from a certified environmentally friendly retail flower provider than from a retail flower provider not certified.”

What would your customers say?

According to the study, 17.68% of the respondents “strongly agree” with that statement, however 38.03% of the respondents did not respond as strongly and simply “agree”. This showed that a majority of participants (55.7%) agreed or strongly agreed. And interestingly, 29.74% of the respondents “neither agree or disagree”.

Figure 12. Frequency statistics for the questions “If an environmentally friendly certification existed for retail flower providers, I would be more willing to make purchases from a certified environmentally friendly retail flower provider than from a retail flower provider not certified.”

Table 11 & Figure 11. Frequency statistics indicating percent of total participants' responses to the questions "When deciding where to make a floral purchase, which of the following aspects of sustainability do you consider to be the most important for a retail floral provider to practice?"

Question Choices	(n)	%
Materials (other than flowers) used in floral design, are sustainable, recyclable, upcyclable, reusable	690	31.8%
Flowers used in floral designs are sustainably grown and sourced	616	28.4%
None of the above are important to me when making a floral purchase	387	17.8%
Floral provider is as energy efficient as possible (uses energy- efficient light bulbs, coolers, electric vehicles, etc.)	304	14%
I do not make floral purchases	175	8.1%

Fair Labor Standards

Higher “very important” percentage in the NE region (43%) versus others, similar among men (42%) and women (39%), and among Gen Z (48%) and Millennials (47%) as compared to other generations.

40%

28%

Organically Grown

Higher “very important” percentage among men (36%) versus women (24%), in the West region (22%) compared to others, and among younger Gen Z (41%) and Millennial (42%) shoppers.

Locally Sourced

Higher “very important” percentage in the NE region (42%) and South region (39%) versus others, among men (41%) versus women (35%), and among Millennials (48%) most and Silent+ generation least (27%).

37%

Importance of Sustainability Issues When Purchasing Floral Products

31%

Hard Goods Made From Recyclable Materials

Similar “very important” percentages across regions, more for men (35%) versus women (29%), and higher among Millennial (42%) and Gen Z (40%).

Biodegradable Pots

Higher “very important” percentage among men (37%) versus women (29%), lower in the West region (23%) and higher in the South (36%), and among younger Gen Z (43%) and Millennial (46%) shoppers.

32%

31%

Biodegradable Sleeves

Higher “very important” percentages among Millennials (43%) relative to other generations, lower in West region (25%) versus others, and slightly higher for men (35%) versus women (29%)

N=1,032

% “Very Important” Overall

When people buy a flower, what “job” are they “hiring” that flower to do?

What will impact flower purchasing going forward?

- Overall growth of the economy
- Supply chain performance
- Labor availability and cost
- Cost of inputs
- Housing market correction
- Inflation outlook
- Likelihood of recession

Assessing the Macroeconomic Consequences of Biden vs. Trump

President Joe Biden and former President Donald Trump will pursue very different economic policies if reelected. In this analysis, we assess the macroeconomic consequences of the policies proposed by the presidential candidates. Both

Chart 1: 2024 Presidential Election Scenarios

Ordered from most likely to least likely

1

Biden & Divided Congress scenario

40% probability

It is challenging for Biden and Democrats to implement a significant economic agenda. This scenario is thus mostly consistent with the status quo. The exception is an agreement extending current lower tax rates for individuals making less than \$400,000 per year. Biden aggressively uses executive orders, but there is legislative stagnation.

2

Republican Sweep scenario

35% probability

Trump makes permanent the individual tax cuts from the TCJA. He imposes higher tariffs on China and many other nations and imposes much more restrictive immigration policies, including more deportations. His deregulatory banking, energy and climate policy agenda is reinvigorated.

3

Trump & Divided Congress scenario

15% probability

Trump pursues most of his economic policies, including making permanent the tax cuts for individuals. Other policies concerning tariffs, immigration and regulations are implemented via executive orders. Many of his policy moves are challenged in the courts, but this does little to dissuade his policies.

4

Democratic Sweep scenario

10% probability

Biden's fiscal 2025 budget is fully implemented. Tax cuts are extended for individuals earning less than \$400,000 per year, but higher-income earners see their taxes rise. Corporate taxes increase, with the statutory rate rising from 21% to 28%, among other novel reforms. Certain tax credits aimed at low- and middle-income individuals are expanded. The increase in government spending is focused on programs to support the finances of low- and middle-income households.

Take-home points

1. **Regional differences prevalent.**
One year of negative YOY comps doesn't tell the whole story.
2. **You must track customer analytics for your trade areas over time.**
3. **Manage your working capital.**
SKU rationalization. Focus on your value proposition.
